

# Data Centre and Managed Hosting Services

## Adaptable solutions to suit your needs

RDA Group offer a range of Data Centre and Managed Hosting Services to meet the needs of our clients in a diverse range of industries. Ranging from leased rack space to web hosting, we can assist you to select the right solution based on your business needs.

By utilising state-of-the-art data centres and communication infrastructure facilities, RDA Group deliver a cost and time effective managed solution and ensure your business is functioning 7 days a week, 52 weeks a year.

RDA Group's Data Centre Services are a perfect platform for you to begin implementing off-site Disaster Recovery plans. For more information on this please see the RDA Business Continuity and Disaster Recovery information sheet.

*"Our clients have realised the increased benefits of our VPS hosting. By migrating your existing mission critical servers to our hosted data centre, you too can have peace of mind that you will achieve maximum uptime and maintain exceptional service levels."*

## Virtual Private Server (VPS) Hosting

### What is VPS Hosting?

Virtual Private Server Hosting bridges the gap between lower cost shared hosting and more expensive dedicated servers. The VPS runs in isolation and has its own operating system and software. Additionally it can have dedicated resources such as CPU and RAM to enable the VPS to maintain service levels of your application.

### Why would you use a VPS?

You would choose to use a Virtual Private Server in your IT strategy if:

- The cost of a dedicated server is prohibitive, but you require its benefits
- Your servers require isolation from other systems that are not provided by a shared hosting solution
- Resource intensive applications need dedicated resources that a shared hosting solution cannot provide
- The applications that are needed are not supported or allowed by shared web hosting providers

RDA Group's VPS Hosting gives you flexibility to leverage your resources without large upfront capital costs. Virtual Private Servers have minimal maintenance costs and provide a level of scalability that can accommodate your growth as rapidly as it occurs.

## Web Hosting

Whether you are just getting started with your first web site or have a dynamic database driven site, we offer a range of Web Hosting opportunities to suit your needs:

- Email Addresses
- Web Traffic (per Month)
- FTP accounts
