

IT Consultancy and Advisory

Professional advice you can trust

In today's IT landscape the technology is constantly changing, however the fundamentals for our consulting remain the same - to focus on your business needs, maintain your independence, act with integrity and provide access to the highest levels of cutting edge expertise.

We are able to provide consulting services within a range of IT areas, from simple implementations through to strategic planning. Through our consultative approach, RDA Group is able to design and implement a solution that is best suited to your organisation, improves your competitive advantage and enables you to focus on your core business.

"We recommend, design and implement solutions that will improve your competitive advantage."

RDA Group's consultancy is based on a holistic view of your business needs, providing advice that not only addresses the immediate concerns, but also looks to the future plans. This approach helps us to provide a framework and strategy that is consistent with your business plan and assists you with the development of a sustainable competitive advantage.

Consultancy services offered by RDA Group will address modern business concerns such as:

- IT Policies and Procedures
- IT Project Management
- IT Business Analysis
- Migration Scoping and Planning
- Systems Implementation and Planning
- Strategic IT Planning

"RDA Group's Audit Services will highlight areas where technology, design and process improvements will increase your operational effectiveness and efficiency."

Auditing Services

As an extension to our consultancy services, we can provide more in depth and granular advice by way of focused analysis on key performance areas within your IT infrastructure.

RDA Group can perform audits and reporting on the following areas:

- Security Audits
- Data Lifecycle Management Audits
- Network Performance and Design Audits
- IT Infrastructure Architecture and Design Audits
- Software Licensing Compliance Audits

In complex IT environments it is important to ensure that all facets of the infrastructure are operating at optimal performance. RDA Group's Audit Services will highlight areas where technology, design and process improvements will increase your operational effectiveness and efficiency.
