

WellPoint Energy EAM

Enterprise Asset Management for the Energy Industry

The energy industry is amongst the world's most asset intensive with companies investing millions of dollars in their operation staples such as:

- mobile assets
- fixed assets
- technology assets
- human assets (experience and certification)

WellPoint Energy EAM manages the entire life cycle and integrates enterprise asset management with your mission critical business systems affording you unparalleled process efficiencies.

Unlike traditional asset maintenance solutions, WellPoint Energy EAM offers a high-specification solution centered on advanced configuration management.

"This solution offers full integration with your existing business systems, ensuring you have the most efficient of processes."

"WellPoint Energy EAM has industry standard information exchange, is built for integration and supports corporate best practices and compliance."

The Highlights

- Improved operational uptime of critical resources
- Reliable programs through simulation
- Powerful insight into resource utilisation and costs
- One solution for scheduling and asset management
- Maintenance scheduling enforcing operational best practice
- Configurable and scalable for your business requirements
- Proactive maintenance of assets including operational history

Technical Functionality

WellPoint Energy EAM works on a Microsoft platform and is powered by Microsoft Dynamics AX. Capitalising on the modular, configurable and scalable capabilities of Dynamics, this solution manages the complete asset life cycle, from asset commissioning through maintenance, modification and decommissioning.

By focusing on an infrastructure to support advanced asset configurations, WellPoint Energy EAM is the leader in managing and scheduling the corrective, preventative, inspection and servicing needs of assets critical to the energy industry.

The Solution In Depth

Ease of Use and Implementation

WellPoint Energy EAM is designed to offer an intuitive interface to maximise user and administrative productivity. Developed in functionally specific modules, WellPoint Energy EAM can be deployed in the configuration best suited to your current needs, with the flexibility to integrate additional modules as your business and needs change. If you require unique application functionality or employee specific enhancements to the system you can rely on the power of Microsoft Dynamics AX to administer quick and easy customisations so your business and systems can grow together.

Asset Registration, Configuration and Rental Management

WellPoint Energy EAM is the industry's leading solution to record, monitor, structure and standardise information about a company's critical physical assets. Based on the usage of asset build rules, WellPoint Energy EAM allows you to build maintained structures of:

- complex mobile assets (rigs)
- simple mobile assets (trucks)
- fixed assets (plants and facilities)
- site rollups (all asset types on premises)

Additionally, you can retain details such as identity, configuration, hierarchy, and technical and commercial specifications.

WellPoint Energy EAM offers organisations the power to track each asset's current and historical locations, maintenance schedule, failure and downtime histories, and sets the table for comprehensive asset performance measurement and cost analysis.

Routine and Ad-hoc Maintenance for Mobile and Fixed Assets

Over the life span of an asset, preventative and unplanned maintenance activities will be required. WellPoint Energy EAM was designed to accommodate all types of maintenance work and scenario planning including the commissioning, decommissioning and modification or servicing of physical assets. Through a methodology of job card allocation, work orders for corrective, planned, inspection or resource maintenance, are created and scheduled in the system, ready for promotion to work in progress status.

Whether your maintenance, repair and operation requirements are focused on mobile assets (asset repair and overhaul management) or physical plants and facilities (shut down management, refurbishment), WellPoint Energy EAM delivers the tools required to manage the interdependencies of asset groups to help you maximise your return on investment in capital assets.

Warranty Management

In asset intensive environments, effective warranty management can save you thousands of dollars by ensuring warranty eligible components are serviced or replaced at minimal or no cost. WellPoint Energy EAM accommodates meter and calendar based warranties and allows for multiple supplier, equipment and asset specific warranties. The warranty register offers warranty status tracking and identifies jobs and assets eligible for a claim against a supplier.

Incident, Accident, Inspection and Permit Management

With WellPoint Energy EAM, you can confidently manage critical policy and regulatory driven business functions, such as incident and accident management, environmental surveys, safety inspections and permit management. By leveraging event templates for maintenance and operational tasks WellPoint Energy EAM eases the burden of data entry and management. You can forecast and simulate your planned operations by defining utilisation scenarios to generate a complete safety or environmental program that includes cost and resource requirements for the defined period.

“WellPoint Energy EAM is the industry’s leading maintenance, repair and operation solution specifically designed to meet the challenges facing asset managers in the ever changing and competitive energy market. A corporations assets must be well maintained in order to ensure the highest degree of business performance and WellPoint Energy EAM does this.”

RDA Group and Microsoft Dynamics AX

Microsoft Dynamics AX is Microsoft’s premier Enterprise Resource Planning (ERP) solution.

As a Gold Certified Partner we specialise in the selection, implementation and support of Microsoft Dynamics AX to solve the financial and business management needs of our clients. We have significant experience in the implementation of Microsoft Dynamics AX as well as other integrated Microsoft solutions such as Microsoft Dynamics CRM.

Microsoft Dynamics AX is an integrated, adaptable business management solution that helps you and your people make business decisions with greater confidence. It works like and with familiar Microsoft software, automating and streamlining business processes and connecting you with global customers, business partners and subsidiaries.
